FEATURES AND BENEFITS

PS3

FEATURES

- The PS3 is a pre-separator that provides an additional separation to the dust extraction process, and can capture up to 95% of the dust before it reaches the dust extractor
- Significantly improves filter performance and reduces frequency of filter maintenance on your dust extractor
- Contributes to a higher airflow and an extended life time of your extractor's filters and motor(s)
- Robust construction, dependable operation and provides virtually a zero-cost in maintenance requirements
- Equipped with a "Continuous Bag" disposal system for effective dust collecting and safe & easy disposal of concrete dust

HD1

FEATURES

- The HD1 is a one-motor HEPA dust extractor, that features a two-stage filtering system comprised of a main conical filter and a HEPA filter
- "Reverse-air" jet-pulse filter cleaning system - effectively cleans and removes dust build-up on the filters
- Easy to use "Inlet closure door" - eliminates the need to remove hoses when pulsing and cleaning filters
- Easily connects to hand-operated power tools to extract concrete dust while cutting and grinding
- Equipped with a "Continuous Bag" disposal system for effective dust collecting

HD2

FEATURES

- The HD2 is a two-motor HEPA dust extractor, that features a two-stage filtering system comprised of one main conical filter and two HEPA filters
- Equipped with 2 HEPA remove at least 99.97% of airborne particles 0.3 micrometers (µm) in diameter, securing a high standard of quality and safety
- 2 Individual motor switches - provides variable suction strength and power
- "Reverse-air" jet-pulse filter cleaning system - effectively cleans and removes dust build-up on the filters
- Easy to use "Inlet closure door" - eliminates the need to remove hoses when pulsing and cleaning filters
- Easily connects to hand-operated power tools to extract concrete dust while cutting and grinding
- Equipped with a "Continuous Bag" disposal system for effective dust collecting

HD3

FEATURES

- HD3 is a three-motor HEPA dust extractor, which features a two-stage filtering system including a conical main filter and three HEPAs
- Equipped with three HEPA filters which are individually tested and certified complying H13
- 3 Individual motor switches - provides variable suction strength and power
- "Reverse-air" jet-pulse filter cleaning system - effectively cleans and removes dust build-up on the filters
- Easy to use "Inlet closure door" - eliminates the need to remove hoses when pulsing and cleaning filters
- Easily connects to hand-operated power tools to extract concrete dust while cutting and grinding
- Equipped with a "Continuous Bag" disposal system for effective dust collecting
